

## ↘ Multichannel ISDN interface

MultiCellink is professional GSM gateway that converts calls from fixed phone networks into GSM-GSM connection. MultiCellink is a flexible system which can be extended if needed, up to 8 GSM channels and four ISDN lines in one cabinet. MultiCellink is a nice Plug&Play solution, which can be easily wall mounted.

Date: 17-02-2012. Rev. 1.0

## ↘ Concept

- ✓ Modular system as:
  - ↘ Standard: 2 GSM lines for 2 SIM cards+ 1 ISDN NT or TE line
  - ↘ Extension to 4, 6 or 8 GSM lines (4, 6 or 8 SIM cards) with 2, 3 or 4 ISDN NT/TE lines in the same unit
- ✓ 1 antenna connection for 2, 4, 6 or 8 GSM lines (build-in antenna combiner included)
- ✓ 1 power supply for the complete concept

## ↘ Configuration

- ✓ ISDN SO configured as NT; ISDN city line against PABC, 2 GSM lines
- ✓ ISDN SO configured as TE interface for 2 lines against ISDN network or against PBX local extension (ISDN SO)
- ✓ LCR function directly in MultiCellink as option; can be connected between the Public ISDN net (TE) and the PABC (NT) or ISDN telephones
- ✓ Can be extended to 4 ISDN SO NT/TE lines which equals up to 8 GSM lines

## ↘ MultiCellink ISDN versions

Item	Version
9820.10990_2	2 GSM lines, 1 ISDN NT/TE lines
9820.10990_4	4 GSM lines, 2 ISDN NT/TE lines
9820.10990_6	6 GSM lines, 3 ISDN NT/TE lines
9820.10990_8	8 GSM lines, 4 ISDN NT/TE lines
