

Mobiline 2G version in the "WhiteBOX" cabinet

Mobiline2000 is so called FCT (Fixed Cellular Terminal) that converts a mobile phone connection into a standard analogue telephone connection. Mobiline2000 fulfils all requirements for fixed line line: national, international and mobile calls, sending and receiving fax, data transmission and dial-up connection to internet. This is a nice Plug&Play solution with build in internal helical antenna (with possible to connect external antenna), build in battery backup and external power supply.

Date: 14-02-2012. Rev. 1.0
